PROJECTS

Zoro — *local AI chat app* github.com/MrEmoji27/zore

terminal-styled chat that runs fully on-device via ollama — streaming, persistent sessions, long-term memory with pinning & categories, file ingestion. fastapi · react · sqlite

Zolt — *end-to-end encrypted messenger* product · beta testers wanted

server is a blind relay that never sees plaintext; history lives only on-device. keys in secure storage, offline queue with auto-delete, webrtc calls. react native · fastify · tweetnacl

EAILS — *engagement-aware learning system* github.com/MrEmoji27/EAILS

tracks student engagement by webcam during video lessons; generates personalised quizzes and adapts pace. team lead — designed the architecture, wrote the entire codebase. flask · mediapipe/opencv · gemini

Anamnesis — *private desktop diary* product · beta testers wanted

text + voice journaling, fully local, with ai-readable export for any model you trust.
tauri · typescript · tiptap

Lumen — *native windows browser* daily driver · source coming

a rust shell around webview2, the interface drawn natively in direct2d. 18.7 mb idle, sleeping tabs, ads and trackers blocked, and an mcp door for ai agents. v0.6.4 · rust · webview2 · direct2d

spektr — *terminal spectrum analyser* github.com/MrEmoji27/spektr

visualises whatever the system is playing — no file, no api, no service. 27 render modes, 40 themes, a hash-vetted plugin api, locked 60 fps. shipped to pypi and as a windows exe. python · numpy · textual

Nex — *peer-to-peer terminal chat* github.com/MrEmoji27/nex

two terminals, one encrypted noise link — no server in the middle, because there is no server. rooms, discovery and calls that carry real sound. an alpha, and it says so. typescript · bun · noise

Zemo's Vault — *lab archive for cse students* shipped

interactive archive of lab experiments — browse year > subject > experiment with code and outputs, plus an arcade mode of mini-games. react · tailwind
